

Opus Faveo deploys management resources directly within a start-up, working alongside the venture's entrepreneurs using our proven skills in analysis, planning, recruitment, marketing, operations, funding, finance, support and oversight. Opus Faveo designs our activities specifically to each new venture's unique and changing needs. We work with all flavors of start-ups but particularly seek those led by historically underserved founders or who have a clear social impact mission.

How We Work

We engage with very early-stage companies and first-time founders during the difficult pre-seed and seed stages. We work as a force-multiplier to the venture's entrepreneurs, providing management, not capital. We are the founders' own custom accelerator.

Fees and Services

Opus Faveo will work with the new venture to make our engagement affordable using a mix of cash, deferred cash, and equity. We are entrepreneurs also and are prepared to take financial risk in order to see new ventures and Opus Faveo grow together.

Who Benefits?

Founders utilize Opus Faveo to make themselves more attractive, more quickly, to investors, partners, and customers. Investors value Opus Faveo within their portfolios because we reduce the risk of failure due to founding team inexperience or lack of bandwidth.

Our Team

Opus Faveo partners have held officer level positions in Fortune 100 companies and have years of experience building new businesses. We maintain an active database of 10,000+ experts across industries who are available as potential advisors, interim and fractional executives.
